

Universal Controller by Zeropoint Energy

The New Earth

AENA

Light Orb

Everything is in your own hand

President : EASTERNGOLDNET - Saeko Morishiro
Engineer : Masayuki Isotani / Designer : Keisuke Tanaka

Serendipity

[sɛrəndɪpəti]

An unsought, unintended, and/or unexpected,
but fortunate, discovery and/or learning experience that happens by accident.
A combination of events which are not individually beneficial,
but occurring together produce a good or wonderful outcome.

◆ Serendipity of Fullerene's discovery

1. Discovery of "Fullerene" by two disparate people

Ericson Research & Engineering succeeded in composition of C₆₀, but could not decode its graph and missed a discovery.

- Richard Smalley : Spectroscopy of Clusters ← Research for Magic Numbers of Carbon Clusters (Fullerene's structure expectation)
- Harold Kroto : Research for Interstellar Molecule ← Research for Unidentified 217nm Absorbed Dose (Perspective of large-scale synthesis)

2. Generally Obscure Formation of Carbon Nano Tube

Sumio Iijima observed electric attachment that occurs when creating fullerene, and discovered carbon nano tube
← Fullerene's researchers are not aware of anything even though they have seen the attachment on it.

◆ Serendipity to structure of AENA Light Orb

1. Starts from Pentakis Dodecahedron + Biconvex Lens

2. Triggers prototype in real world → Mass-produce ultimate end product

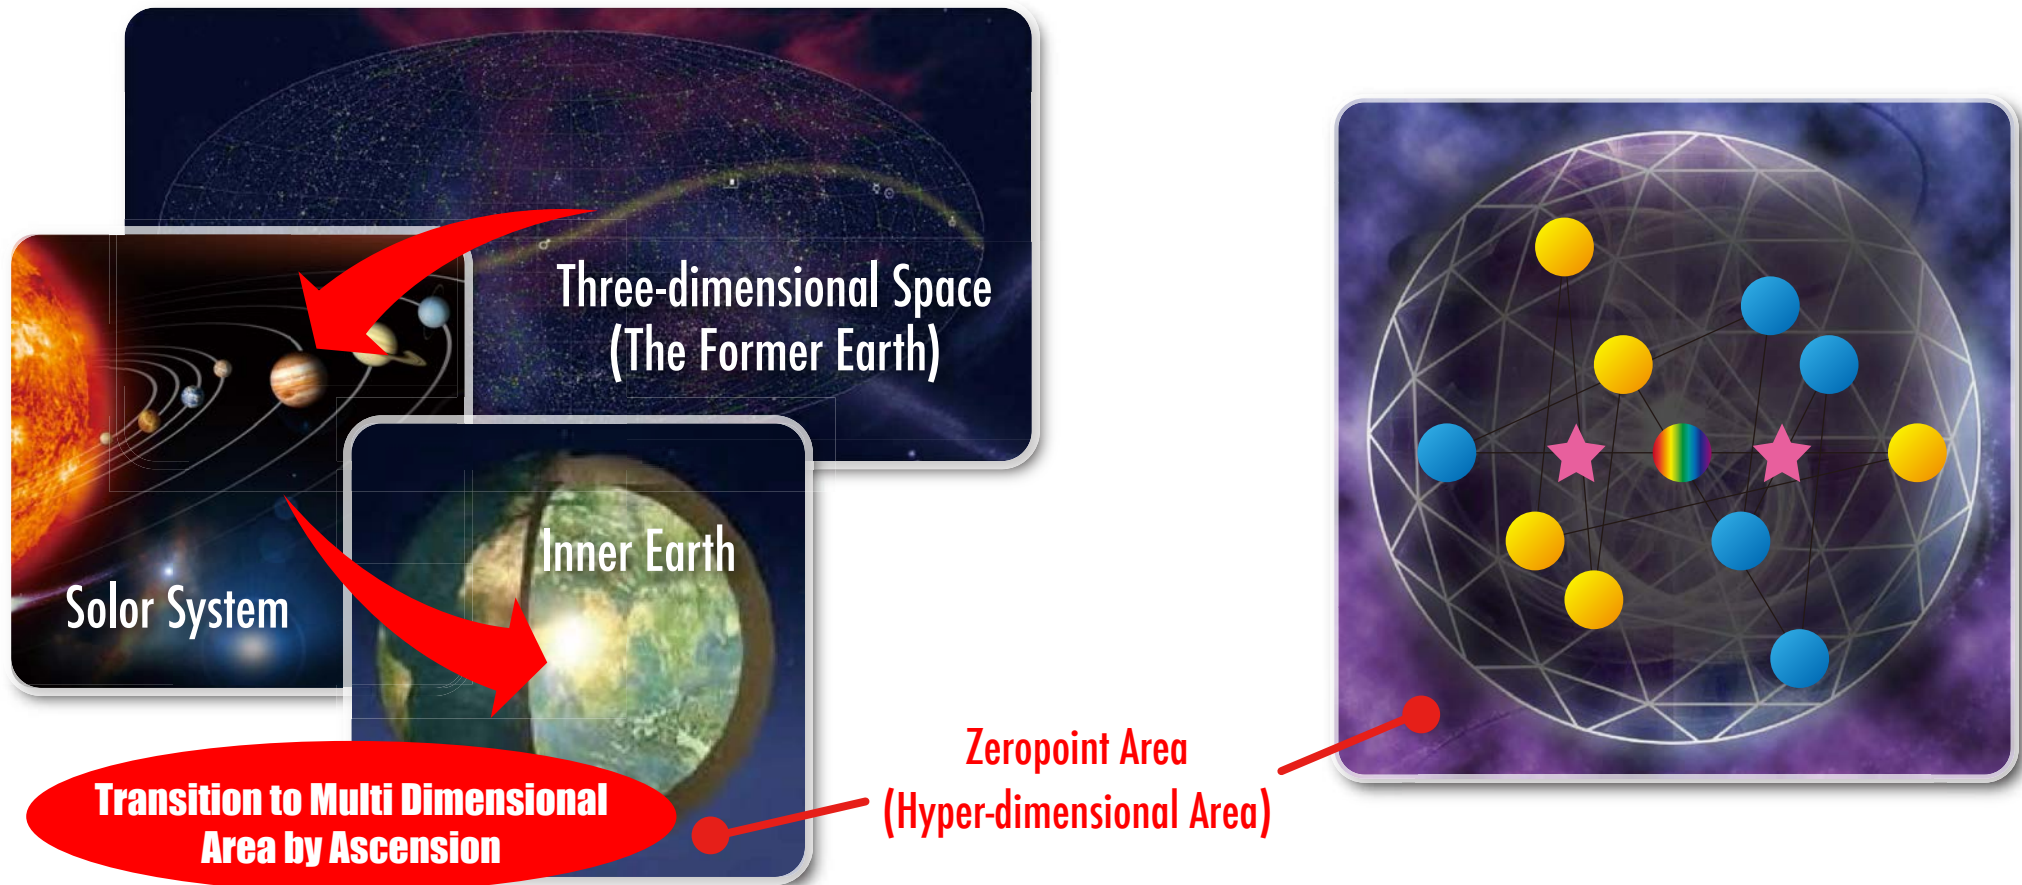

3. Connection of keywords

- "Way to create orb by faces" → Buckminster Fuller's dome (structure of geodesic)
- "C₆₀ fullerene was named from fuller's dome (Bucky Dome)"
- "Becomes hyper diamond when fullerene is compressed with high pressure"
- "Diamond has really high refraction index" → Spectroscope (occurrence of rainbow) and total reflection (containment of light)
- "Appearance of golf ball" → If outside is concave, inside becomes meniscus lens. → Focal point is mobile → Flexible coordinates
→ Becomes controller
- "24G has high conductivity" → "Stays mixed as nano particles" → A divine power of Ushitora no Konjin (the Golden God of the Northeast)?

Zeropoint Energy System

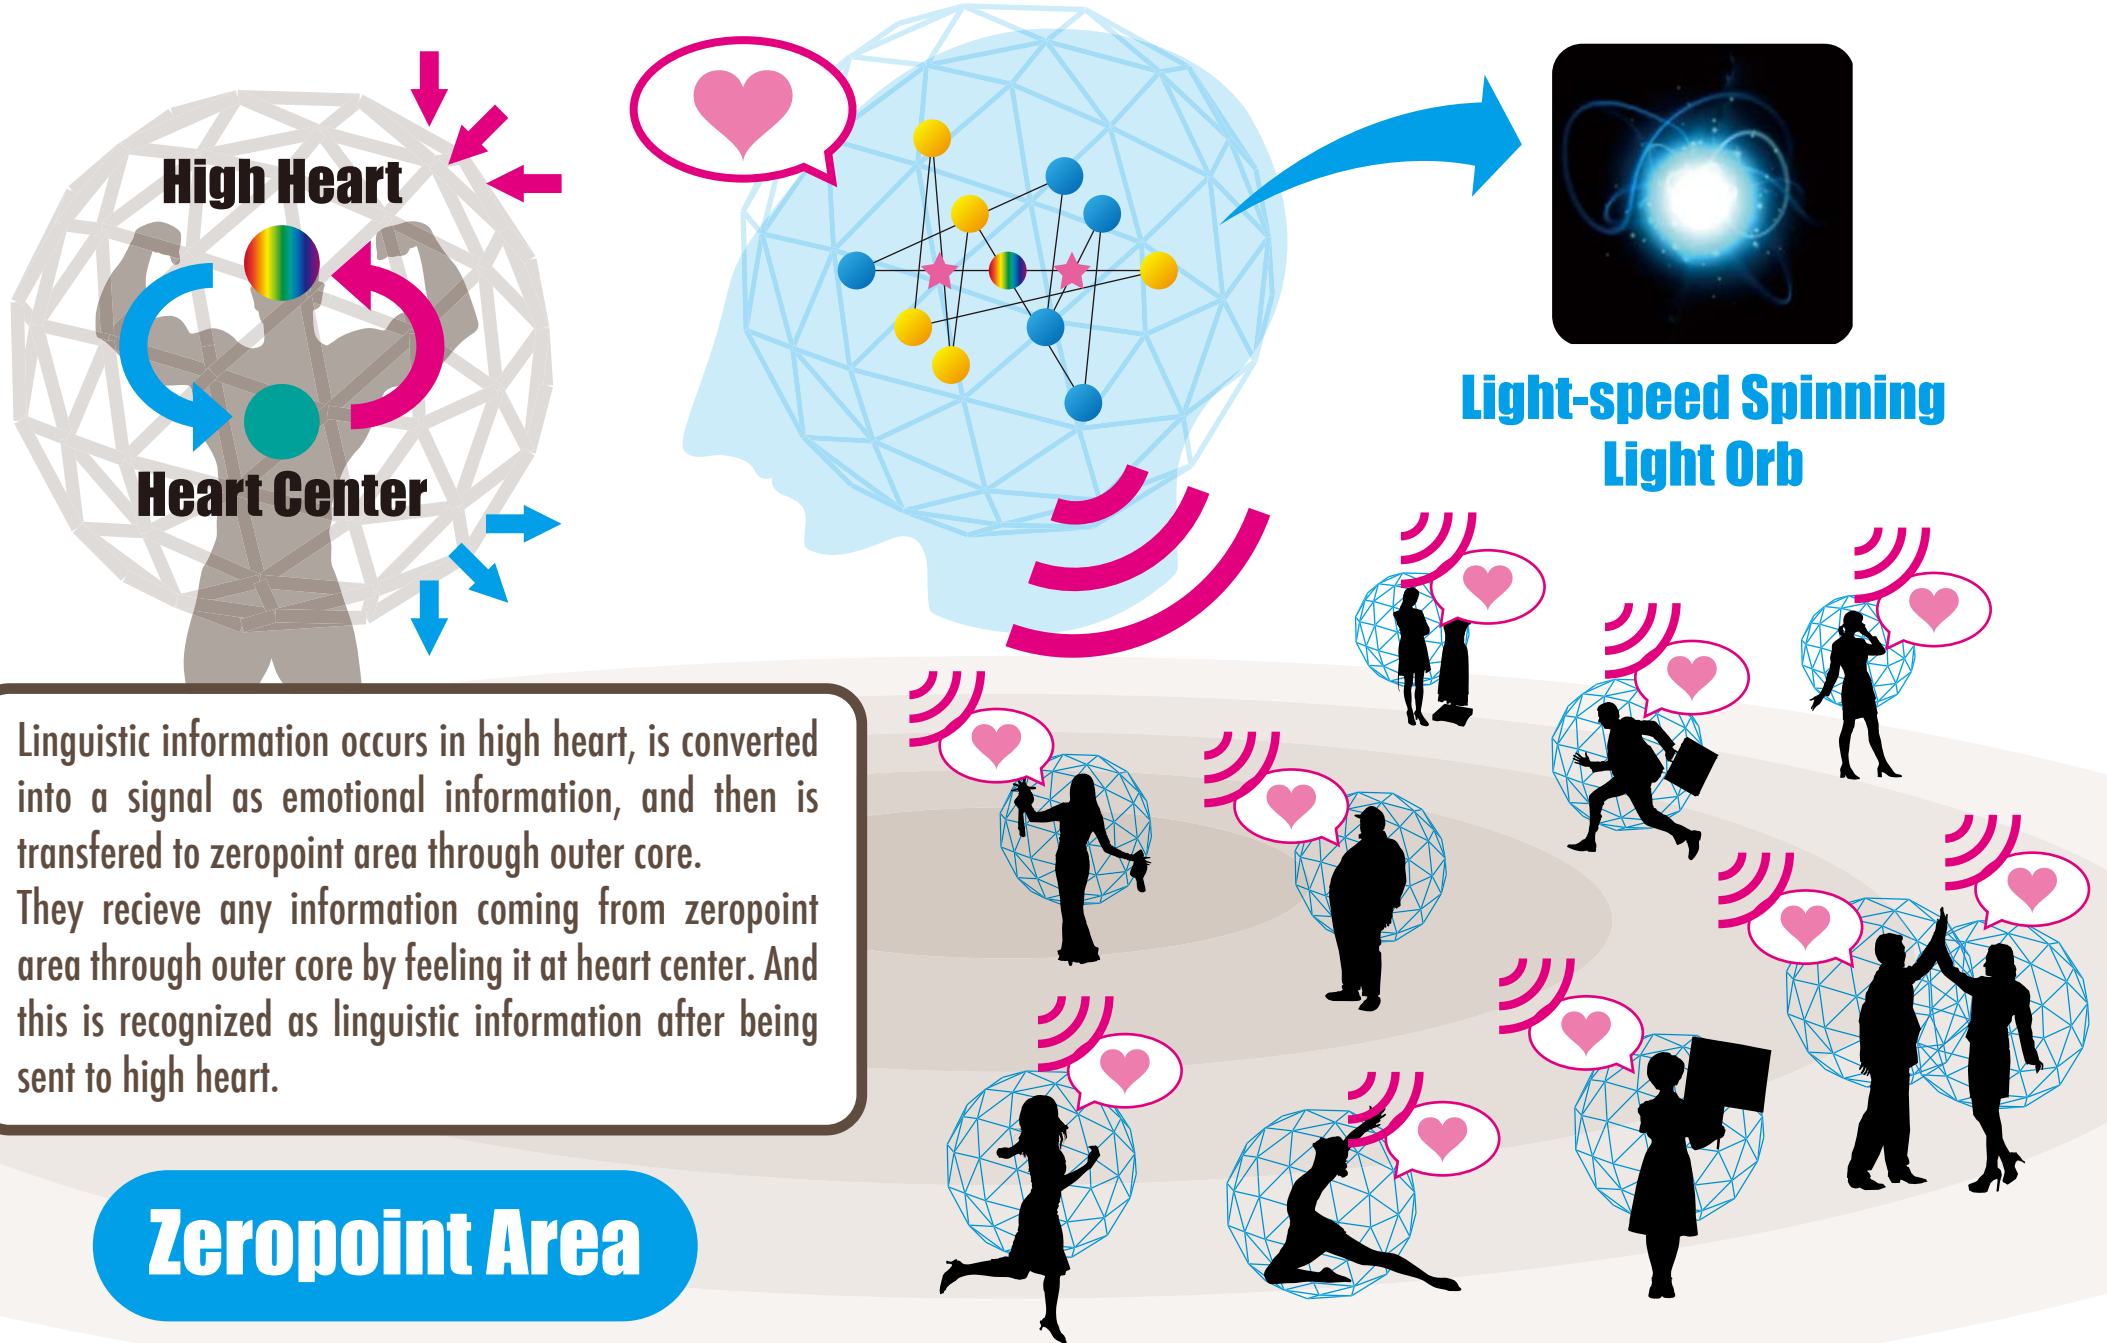

A zero point energy of AENA is created by light operation system cooperated with all the galaxy planets that are realigned inside the ascended inner Earth.

Three-dimensional Space (the former space) will shift to multi-dimensional area (5 to 13 dimensions) by ascension. This spot is the inner Earth where the new Earth is floating in zero point space (hyperdimensional area). The whole galaxy around the former solar system is realigned center of high dimensional space (13-dimensions = zero point) as "new Earth system" and it spins consciousness of "LOVE" at light-speed by the laws of light = Merkabah. A source of light for the inner Earth does not go through outer core, but is connected to a zero point space of outer layer of the Earth inside and outside. It consists of all in the same photon model from micro to macro as "presence".

Zeropoint Telepathy

The image shows the cover of a book titled 'TIME WARP 2012'. The cover has a textured, aged, light brown background with faint, decorative swirls and patterns. The title 'TIME WARP' is written in large, bold, blue letters with a white outline, and '2012' is written below it in the same style.

TIME WARP

Platinum Twin Ray

Multi Dimensional World

Anima / Animus Electron that Activates Photon
(Example of female case)

Prototype
Female

Electricity (Light Code)

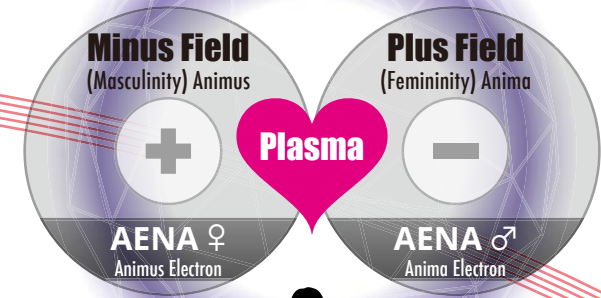

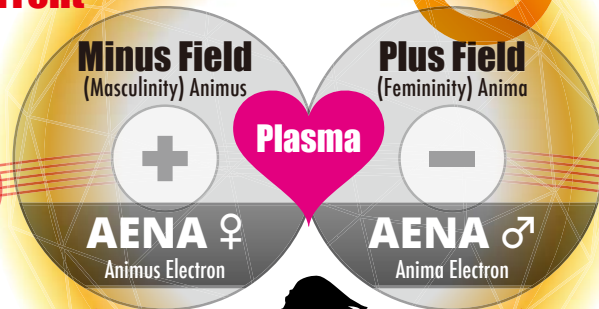

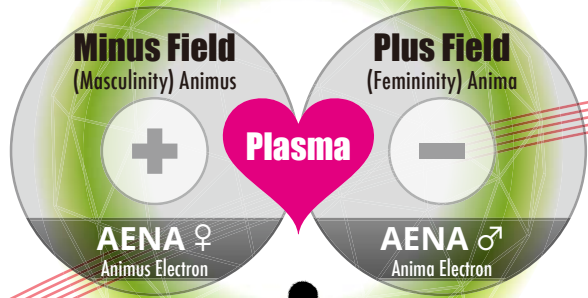

Electric Current

Prototype **Male**

(or female with strong masculinity)

Prototype **Female**

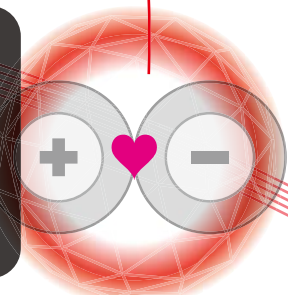

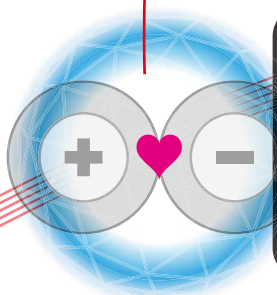

(or male with strong femininity)

Other Self

Twin Ray with the same light code

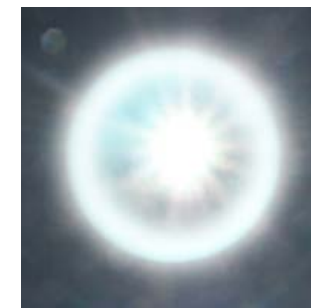

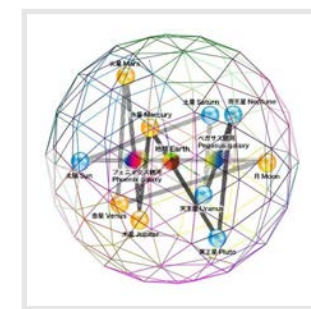

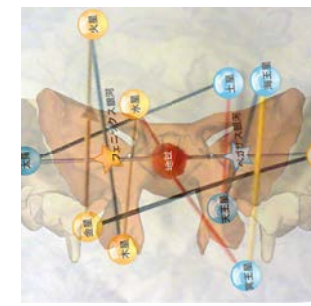

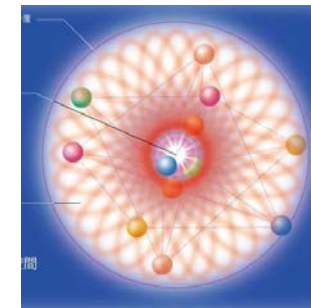

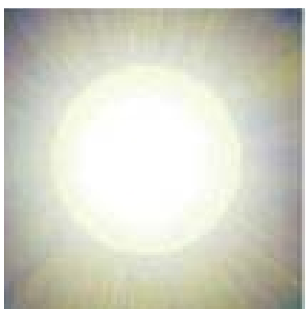

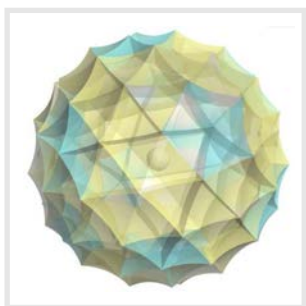

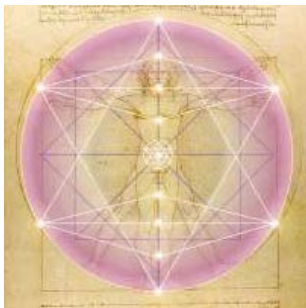

Nothing is the same type (Light Code) as well as fingerprint. Principle that is "Oneness = I am YOU" originally comes from both are "myself". Individual personality has difference even though they are the same photon model. If one exists independently, he/she has already had a complete integrity.

Consciousness = Materialize / Crystalize Light

Once passing outside of death in the former space, there was a light first in zeropoint area (being). The light linked to new dimensional space (ascended multi dimensional space). With "13 essences of conscioisness" , the light created Makerbah (a law of light) from 11 planets and 2 galactic elements. The Makerbah was born in human' s heart center, and linked to human body, the earth and the universe in cooperation with high heart.

13 essences of Consciousness

Love

Courage

Laugh

Freedom

Mercy

Joy

Trust

Truth

Beauty

Fertility

Gratitude

Wisdom

Bliss

STEP 1

When quantum mechanical change startz associating with both mind and emotion, mind gets to have multi dimensionality, and emotion recieve unconditional love and have ability to include and share the love.

STEP 2

These properties perform as "Virus Defensive Device". And then they recieve immortality.

STEP 3

This energy field creates "lens" and starts radiating multidimensional energy around body.

STEP 4

Your perception develops beyond phisical reality and you enable to do telepathic communication.

STEP 5

Above fifth dimension, vibration with mind forms and determins level of embodied reality.

STEP 6

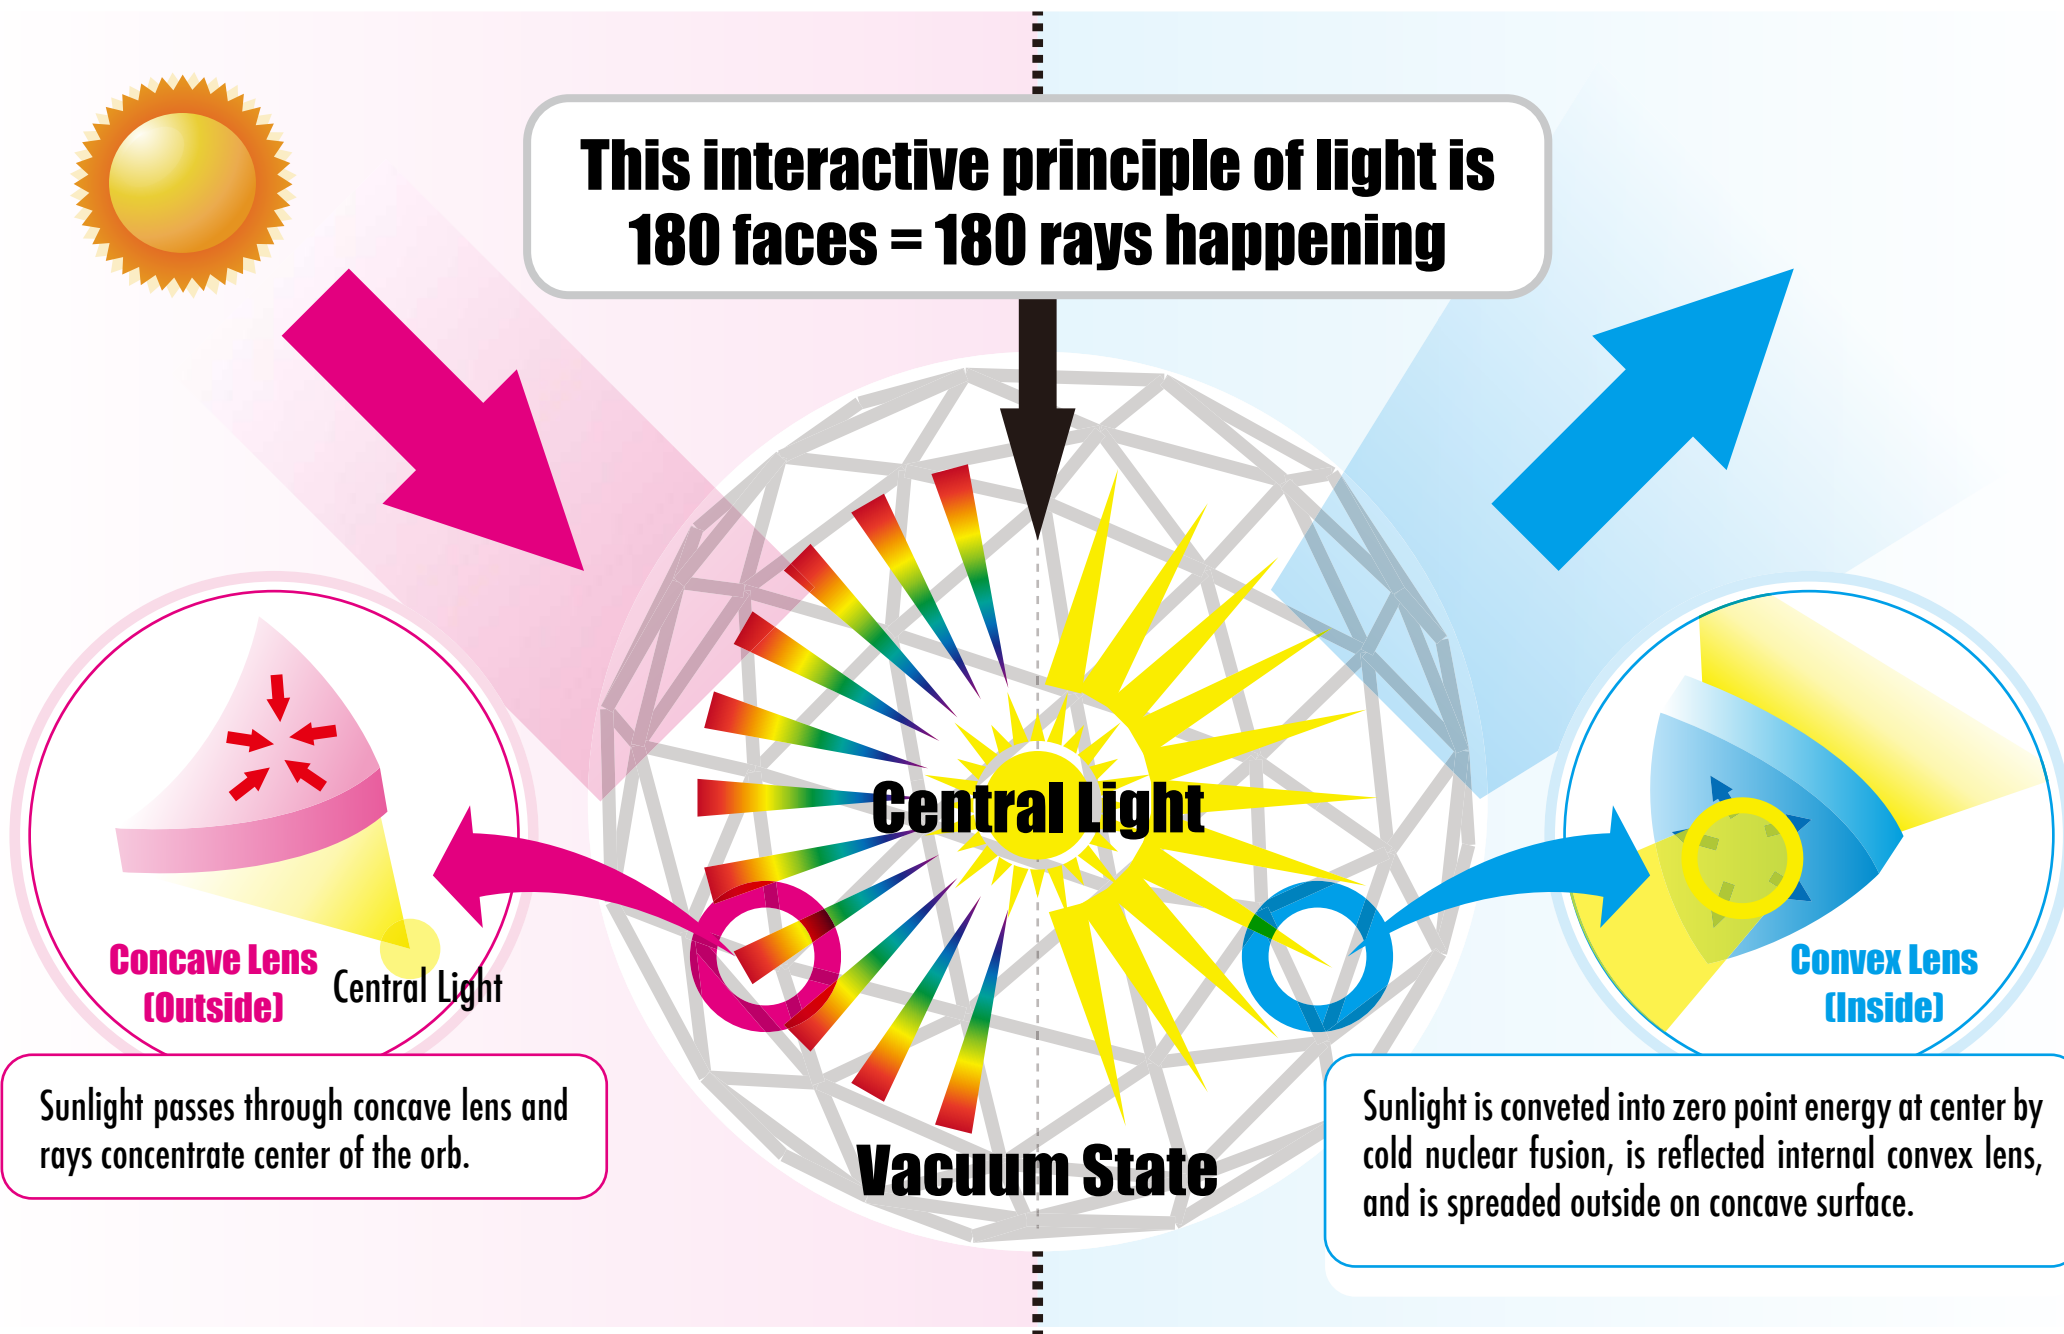

Your consciousness gravitates immediately toward reality with higher vibration that your mind embodies.

Thus, it starts creating a path of energy to the new Erath.

Organic Computer / Principle of AENA

**This interactive principle of light is
180 faces = 180 rays happening**

Central Light

Vacuum State

Concave Lens (Outside)
Central Light

Convex Lens (Inside)

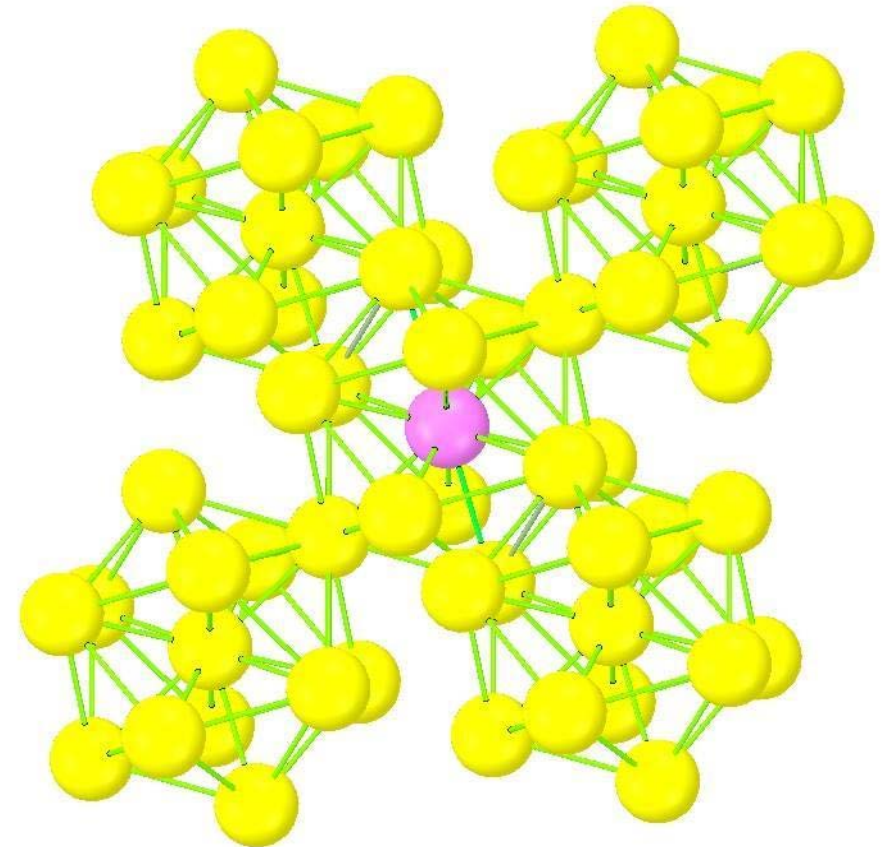

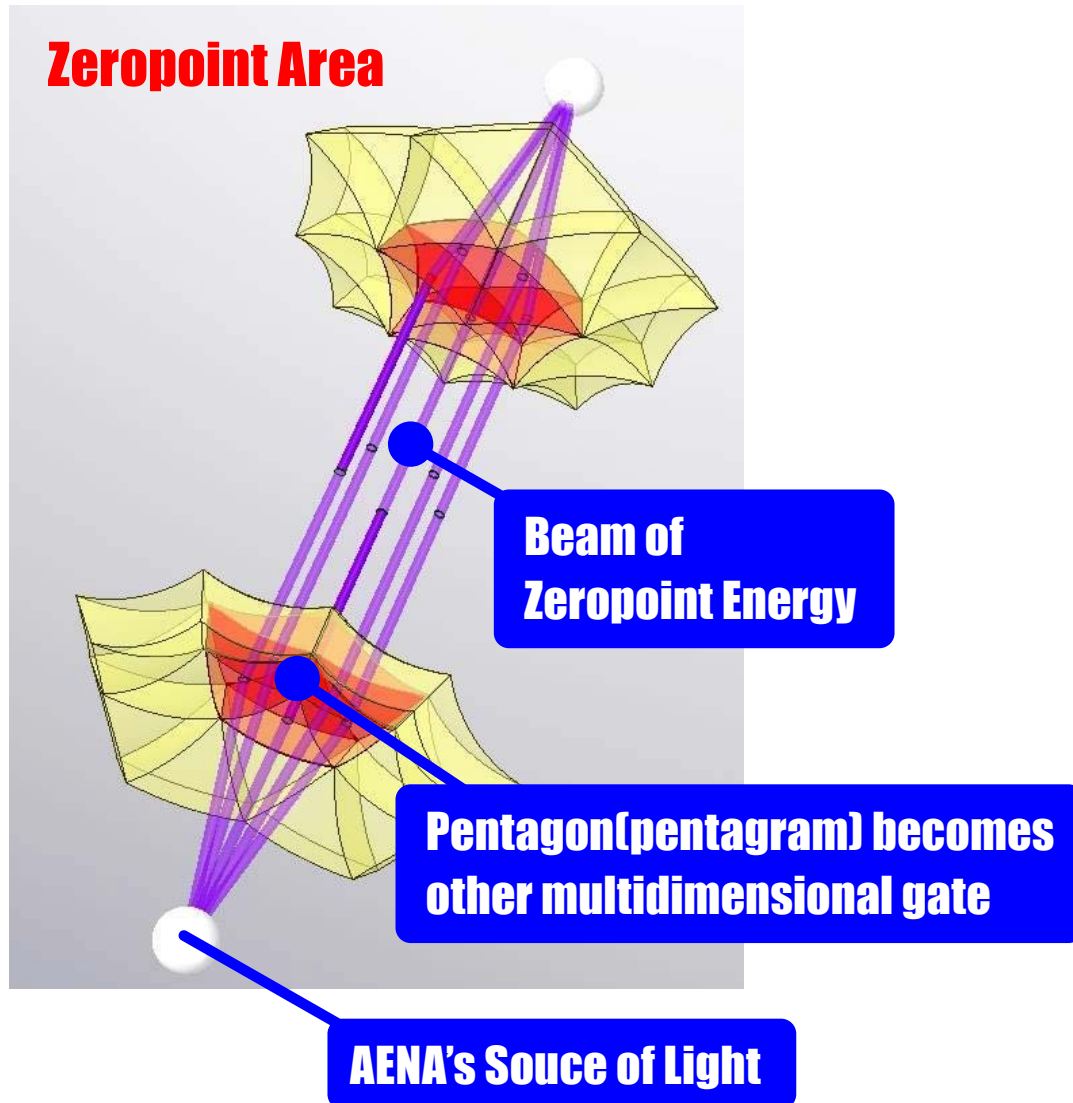

Sunlight passes through concave lens and rays concentrate center of the orb.

Sunlight is converted into zero point energy at center by cold nuclear fusion, is reflected internal convex lens, and is spreaded outside on concave surface.

Channels of Telepathy, Warp, Teleportation Utilizing Zeropoint Energy

When consciousness hits on a certain target, it occurs beamlike circuit of zeropoint.

Love vibration of zeropoint energy cooperates freely all over the univfers

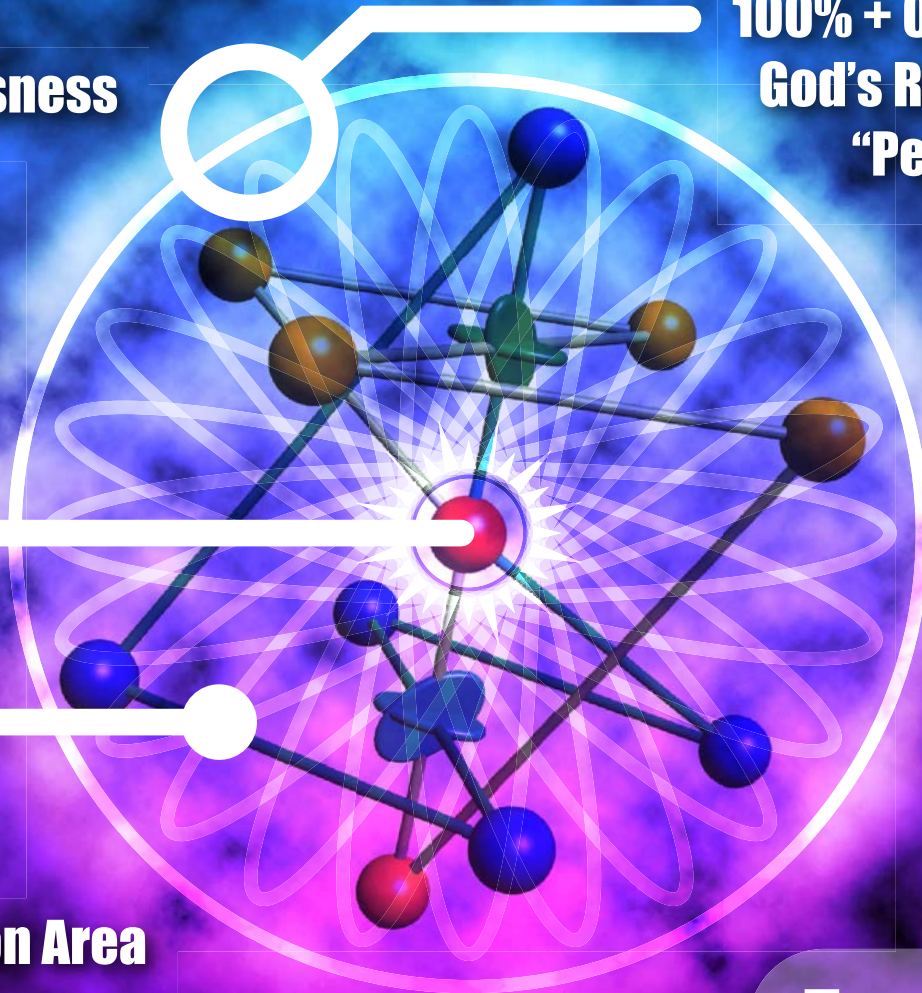

100% Pure Consciousness

**100% + 0.001% Extra Essense
God's Radioactive Principle
"Perfectly Clear Mirror"**

Photon Nuclear Fusion Area

Zeropoint Area

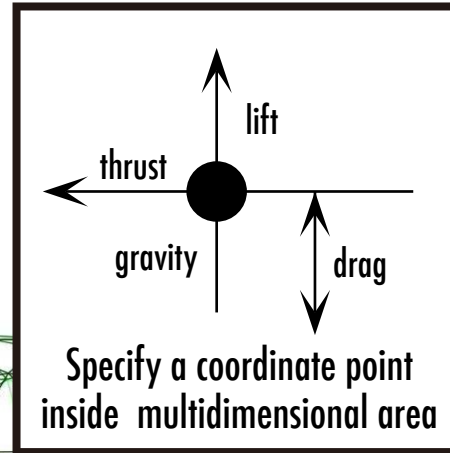

Specification

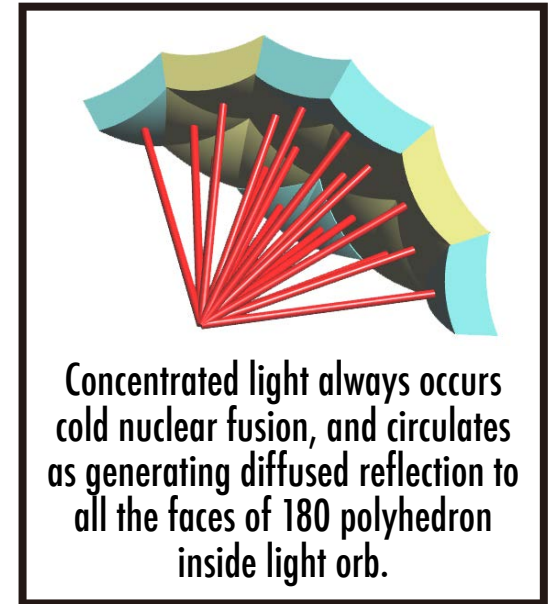

The structure has a source of light that illuminates infinitely in a vacuume area of 180 polyhedron.

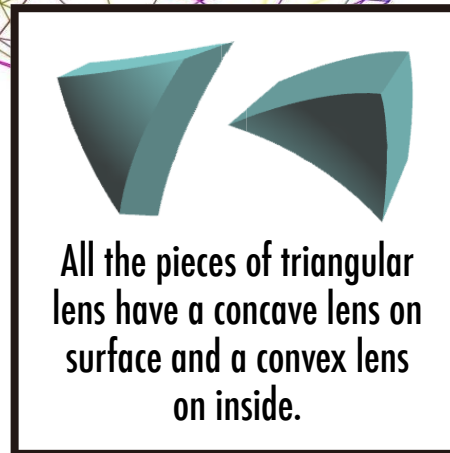

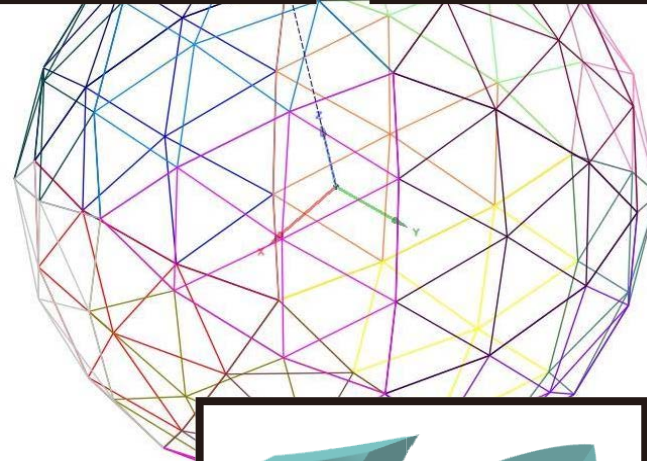

Everything about space is in the new Earth.

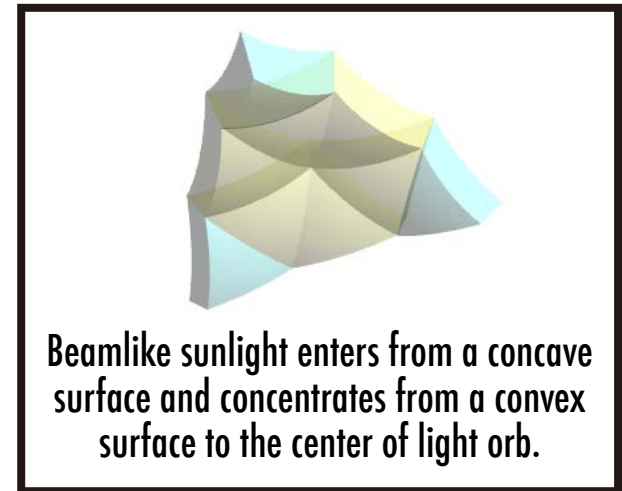

Specify a coordinate point inside multidimensional area

Concentrated light always occurs cold nuclear fusion, and circulates as generating diffused reflection to all the faces of 180 polyhedron inside light orb.

All the pieces of triangular lens have a concave lens on surface and a convex lens on inside.

Beamlike sunlight enters from a concave surface and concentrates from a convex surface to the center of light orb.

Materials

Outer core 180 polyhedron : C60 / hyper diamond

Size

Approximately 3cm and larger that fits in the palm.

Focal Length Shift

General Spec

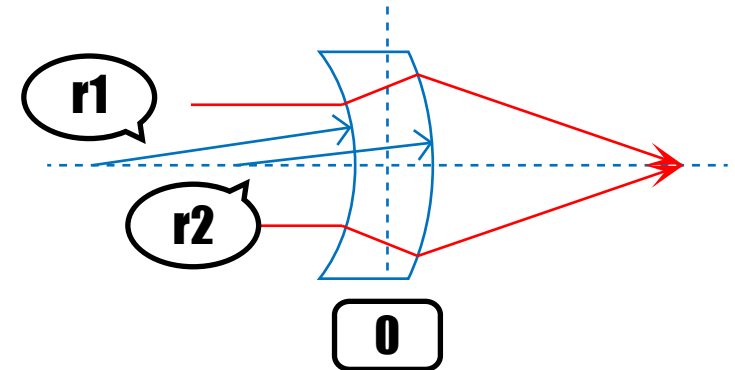

- Enter sunlight and concentrate light into focus
- Outward of Lens : Approximately $\phi 3 \sim 4\text{mm}$
- Material :
 - ~ $\phi 10\text{mm}$ --- Hyper Diamond (K24 included)
 - $\phi 10 \sim 1000\text{mm}$ --- Acryl, PET, Synthetic silica
 - $\phi 1000 \sim$ --- Frame+Acryl, Polycarbonate

- Focal Length : $f = 15\text{mm}$ (center)
- Mobility makes objective of light orb work fine. (optional)
- Thickness of Lens : $t = 3\text{mm}$

- Formula of paraxial ray thin lens : $1/f = (n-1)(1/r1 - 1/r2)$

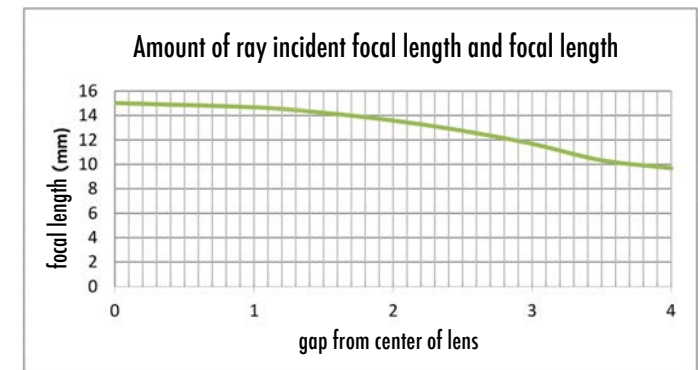

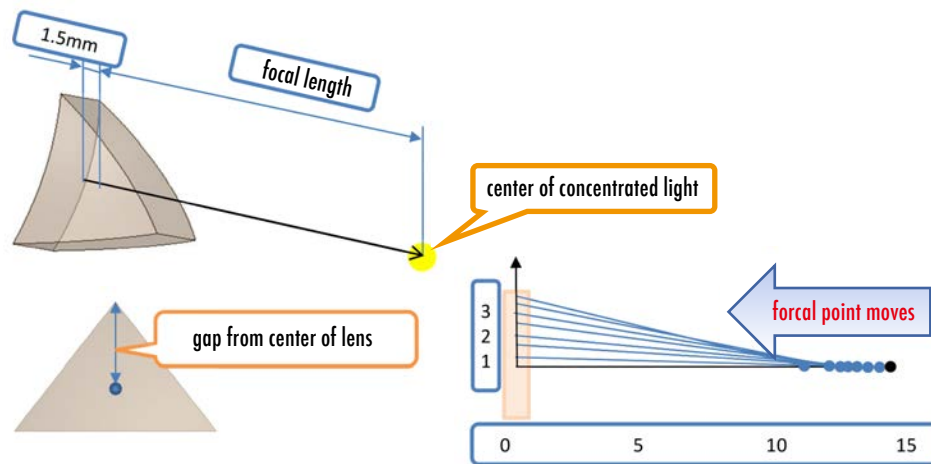

- Lens option : biconvex lens, meniscus lens, convexoconcave lens

Biconcave lens does not concentrate light, but focal length is adaptable. Inspiration captured from an appearance of golf ball leads to a use of meniscus lens, which is external concave lens and internal convex lens.

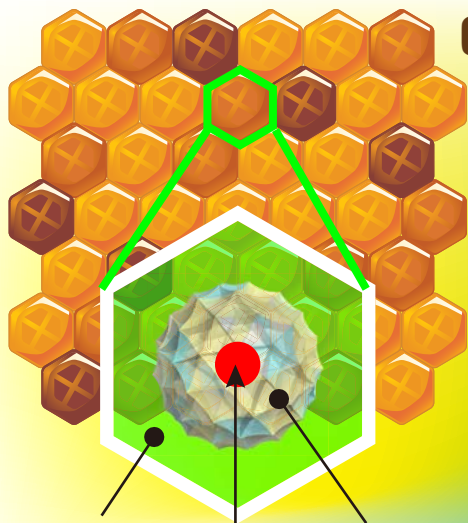

Ray Discrepancy from Center	Focal Length
0.001	15.0
1	14.7
1.5	14.2
2	13.6
2.5	12.7
3	11.7
3.5	10.3
4	9.7

Hyperbody made of Photonic Cell in Multidimensional Area = Hyper Human and Ecosystem

Composition of Body

Ceramide
Control of Apoptosis
Photonic Cell
Somatid

A ecosystem of light in the inner earth is that humans (plants) grow towards the sky and crawl along the surface of the earth that is also a source of light in the universe. Plasma (Zeroint Energy) in life follows front and back spherically like trunks and roots of trees, and has a directivity growing towards inside of outer core and growing towards the source of light at the center.

**New Earth
Center Core
(Source of Light)**

Multidimensional Area

**Circular Breathing of
Zeroint Energy**

Hyperdimensional Area

TREE = HUMAN

Ground

**Interactively occurring plasma
with good balance
and grounding**
